

Basic Detail Report

Toy, Pull

Date

c. 1939

Primary Maker

Wolverine Supply and Manufacturing Company

Medium

metal, wood, paint

Description

Locomotor pull-toy. Formed sheet-metal with tabbed construction, in the form of a streamlined steam railroad locomotive; rounded bullet front, with lithographed details in red, white, blue, black, including rivets, speed lines, windows, doors, etc.; low (red) metal smokestack near front; hole in front for Pull-cord (missing); set on 4 turned wooden wheels on wire axles; as the toy is pulled forward, a cam on rear axle strikes a gong mechanism, producing a bell-like sound.

Dimensions

Height x Width x Length: 4.5 × 4.125 × 17.313 in. (11.4 × 10.5 × 44 cm)
