

# Basic Detail Report

---

## Lens

**Date**

1997

**Medium**

Glass; Paint

**Description**

Deep blue-green color traffic-signal lens; machine pressed: a shallow concave disc, the rim of which forms a wide flange for mounting; front side of lens is smooth; reverse has embossed bar & chevron shapes which together form an arrow, these have an embossed diffusion stippling; the entire reverse side except for the arrow is coated with a heavy (metallic?) dark-grey blackout paint, so that when in place on a fixture, only the arrow is illuminated

**Dimensions**

1 in. (2.5 cm)
