

Basic Detail Report

Bottle, Medicine

Date

c. 1860

Medium

glass

Description

Transparent light aquamarine glass medicine bottle. The body is a tall, narrow cylinder with a domed shoulder, and cylindrical neck with a flat flanged lip. The base is concave with an open pipe pontile scar. There is a short line which may be a seam line near the base, but the bottle appears largely hand-formed, especially in the asymmetry of the shoulder.

Dimensions

4 x 0.75 in. (10.2 x 1.9 cm)
